Thieves Waterless Hand Purifier: A Better Way to Fight Germs

Lehi, Utah—Safe for children and adults alike, Young Living Essential Oils' new Thieves® Waterless Hand Purifier has been designed to clean the hands of germs and wherever you may be. Many hand sanitizers on the market contain antibiotic and synthetic ingredients that kill bacteria. Unfortunately, because of the simplistic nature of these synthetic ingredients, it is not uncommon for bacteria to develop a resistance. However, Thieves Waterless Hand Purifier utilizes pure, therapeutic-grade essential oils, including Young Living's Thieves blend, which features clove, cinnamon, eucalyptus, rosemary, and lemon essential oils, to create a safe, effective hand purifier. Thieves has been university tested and proven effective for its natural cleansing ability. Also, peppermint essential oil is used to denature the ethanol in Thieves Waterless Hand Purifier rather than synthetic chemicals to ensure an all-natural formulation.

With active skin-moisturizing ingredients, including natural aloe and vegetable glycerin, Thieves Waterless Hand Purifier will not leave the skin feeling dry or scaly. A nickel-sized amount rubbed into the hands will continue to purify long after application, leaving the skin soft and smooth. At home, in the car, at the office, or on the way to school, Thieves Waterless Hand Purifier protects wherever you go.
